

Partnership Agreement

In partnership with AaB (Aalborg Boldspilklub/Aalborg Ballgame Club), we are focusing on the digitization and efficiency of board work.

The collaboration aims to professionalize and digitize the board's work, which contributes to optimizing structure, overview, and transparency in the board's activities. This initiative includes both the use of the board portal for the club's own management and board, as well as an intuitive online portal for the club's business network.

The portal ensures that it is easy to share documents, supports the digital transformation, and establishes secure frameworks for data processing. Our joint effort focuses on good governance, responsible operational management, and data security.
