

## Partnership Agreement

In a strategic partnership with LOS – Landsorganisationen for sociale tilbud (The National Association for Social Providers), we are initiating a targeted focus on the digitization and efficiency of board work. This initiative encompasses the social providers, nursing homes, and institutions affiliated with LOS's membership.

LOS performs a central function in promoting good management and governance within the sector, which includes work with quality development, documentation practices, and responsible operational management. This collaboration is essential to support the digital transformation and establish secure frameworks for data processing, including compliance with GDPR legislation and strengthening information security.
