

Partnership Agreement

We collaborate strategically with Børneringen (The Children's Association/Ring) to promote the digitization and professionalization of board work in daycare institutions, residential homes, and affiliated member organizations.

This partnership contributes to optimizing structure, overview, and transparency in the board's activities.

Børneringen has long been a key player in supporting its members with advice and development. Our joint efforts focus on good governance, responsible operational management, and data security, based on the fundamental values of the pedagogical and social sector.
